

Lloyd R. Encallado

SENIOR FULL-STACK ENGINEER

PROFESSIONAL SUMMARY

Senior Full Stack Developer with 9+ years of experience designing, developing, and maintaining scalable web applications, with a strong focus on PHP, Laravel, and modern JavaScript frameworks. Experienced in building complex systems, integrating third-party services and payment gateways, optimizing application performance, and leading development teams. Seeking to leverage technical expertise and hands-on experience to deliver reliable, maintainable solutions while contributing to architectural decisions, development best practices, and continuous improvement.

Claude, Cursor, OpenAI, Laravel Claude, AWS, Google Cloud Platform, Twilio, Chargebee, SendinBlue, Brevo, Sendgrid, Salesforce, HubSpot, PayPal, Stripe, Apple Pay, Google Pay, Paymongo, Bitbucket, Gitlab, Github, Jira, Infinity, Linux – Ubuntu

EXPERIENCE

SENIOR FULL-STACK ENGINEER – (TEAM LEAD)

SmartCharts Pty Ltd | Jul 2020 – Present

In my role as a full stack web developer, my responsibilities centered around the development, maintenance, and support of various projects.

This included the Smartcharts customer's portal for trading platform, payment checkout pages, subscription management tool with different payment gateways, and a Sale system for conducting new sales, event bookings, managing of installment payment schedules and managing customer's information and sale.

Tools and Technologies: PHP, Laravel, Vue, Javascript/HTML/CSS, Nuxt, Livewire, Filament, MySQL, AWS, Linux, Salesforce, HubSpot, ChargeBee, Stripe, PayPal, Apple Pay, Google Pay, Braintree

LEAD SOFTWARE ENGINEER

Amp Lab Inc. | Apr 2019 – May 2020

I oversaw and managed a team of developers, providing support to maximize their skills. I actively participated in team meetings, offering ideas and updates on project deadlines, designs, and enhancements.

I played a key role in developing an internal integration platform and collaborated on all stages of the systems development lifecycle, from requirements gathering to production releases. My responsibilities included maintaining existing applications, designing and delivering new ones, and exceeding client expectations by developing software applications.

Notable projects I worked on included the creation of internal tools like "Equalwrites" for gender-neutral word analysis and "Docs on Call," an online doctor's consultation. I also contributed to external applications, including an interactive presentation app for healthcare professionals and mini-games for Marlboro and Nestle.

Tools and Technologies: PHP, Laravel, Vue, Javascript/HTML/CSS, Nuxt, MySQL, AWS, Linux

ABOUT ME

I'm passionate about coding, and I thrive on the creative problem-solving opportunities it presents in web development.

I love watching animes and reading mangas.

EDUCATION

Lyceum of the Philippines University
BS Information Technology

Jose Rizal University
BCS Computer Science

SKILLS

Problem Solving

Adaptability

Willingness to learn and stay updated with the latest web development

SOFTWARE DEVELOPER - FREELANCE

Amplify Inc. | Oct 2018 – Mar 2019

In my role, I focus on developing various web applications, including a QR Registration System, JavaScript-based mini games, and event apps for esteemed clients such as SM MOA, Nestle, and Coca-Cola.

SOFTWARE DEVELOPER

Infinite Ideas and E.X.C.I.T.E Inc. | Apr 2016 – Oct 2018

In my role, I am responsible for the development and maintenance of both internal and external web applications.

Externally, my focus lies in developing web applications specifically designed for events. These applications are crafted to enhance event experiences and provide seamless functionalities for attendees, organizers, and stakeholders.

Additionally, I handle the corporate websites for my company and its sister company. By overseeing these websites, I ensure their smooth operation, regular updates, and effective representation of the organizations' brand and offerings.

JUNIOR PROGRAMMER

Creznaj System Solutions | Jul 2012 – Jun 2013 and Sep 2015 – Feb 2016

In my role, I engaged in regular meetings with the Project Manager and Senior Developer, providing comprehensive project reports and milestone updates on a weekly basis. This ensured effective communication and transparency throughout the project lifecycle.

As part of my responsibilities, I developed code fixes and enhancements to improve the functionality and performance of the systems. This involved working with technologies and tools such as PowerBuilder and MSSQL, leveraging their capabilities to deliver robust solutions.

One notable project I worked on was the Human Resource Information System (HRIS). Within this project, I contributed to the development and maintenance of the system, ensuring accurate and efficient management of HR-related data and processes.
